## PROFESSIONAL SUMMARY

I am a dedicated healthcare professional with a strong background in both pharmacy and nursing, now seeking to continue my career in a hospital setting as a nurse. My experience in patient care and pharmaceuticals has given me a deep understanding of individual health needs, the ability to make well-informed clinical decisions, and a strong foundation in building trust with patients and their families.

My holistic approach to nursing allows me to assess patient conditions thoroughly, develop effective care plans, and provide compassionate, continuous support.

## SKILLS

- |                             |                         |

## WORK HISTORY

**Well-Aid Pharmacy & Store, Lagos, 2023-2024**  
**Nurse/ Pharmacy Assistant**

### *Duties:*

- **Vital Sign Monitoring:** Regularly measure and record patients' vital signs, including temperature, blood pressure, pulse rate, and respiratory rate. Report any significant changes or abnormalities to the healthcare team.
- **Medication Administration:** Assist in medication administration, following established protocols and guidelines. This involve preparing and administering oral medications, assisting with injections, and ensuring accurate documentation.
- **Patient Observation:** Observe patients' physical and mental conditions, monitoring for any signs of discomfort, distress, or changes in health status. Report any concerns promptly to the registered nurse/supervisor.
- **Infection Control:** Follow proper infection control protocols, including hand hygiene, personal protective equipment (PPE) usage, and maintaining a clean and safe environment for patients and staff.

## **Greenbalm Pharmacy, Lagos 2019-2022**

### **Nurse**

#### **Duties:**

- **Patient Assessment:** Conduct comprehensive and systematic assessments of patients' physical, psychological, and social needs. Collect and analyze relevant health information to develop an accurate nursing diagnosis.
- **Medication Administration:** Administer medications as prescribed by physicians, adhering to medication safety protocols and accurately documenting administration details. Educate patients on medication usage, potential side effects, and necessary precautions.
- **Wound Care and Dressing Changes:** Perform wound assessments, provide appropriate wound care, and apply and change dressings as needed.
- **Patient Education:** Educate patients and their families about disease management, treatment plans, and self-care techniques. Provide instructions on medication administration, lifestyle modifications, and preventive measures to promote optimal health outcomes.
